

3 Installation

3.1 Mounting the VCP

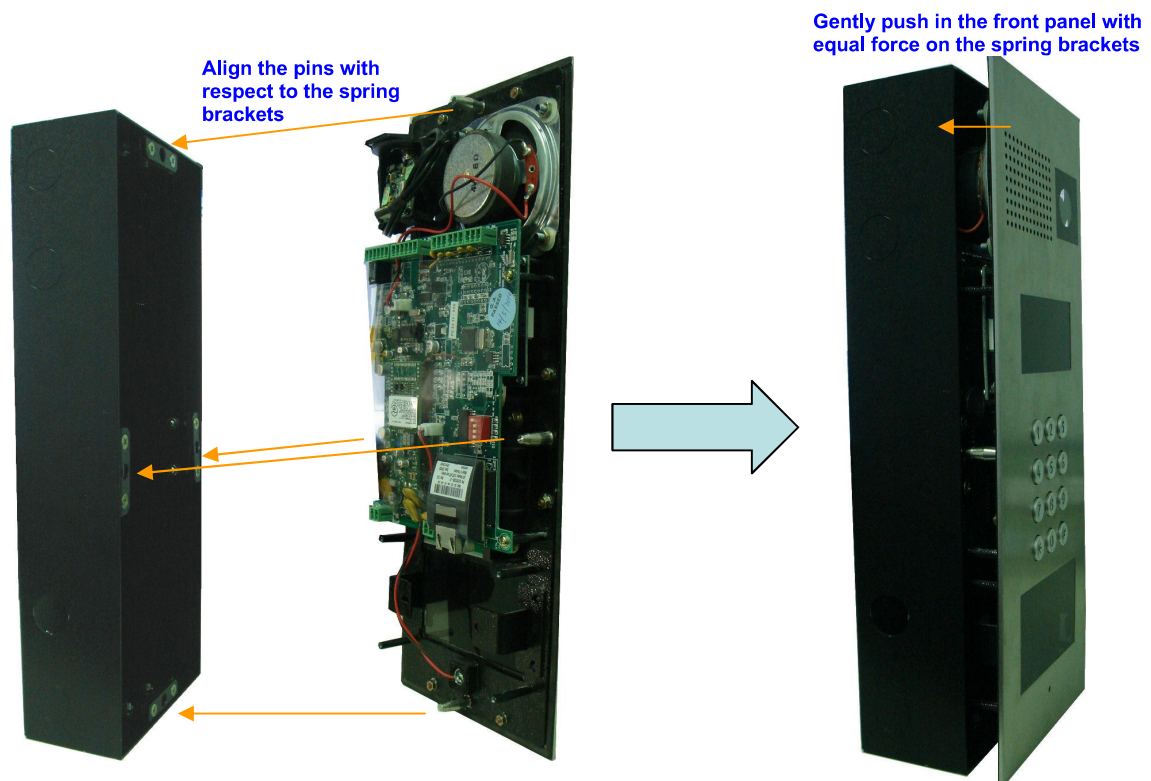

It is recommended that the VCP is to be flush mounted on a wall with the aids of recess mounting box. The hole size to hold the recess mounting box on a wall is shown below.

There are 4 spring brackets that have to be mounted on the recess mounting box. The assembly of the spring brackets and the recess mounting box is as shown in the diagram below.

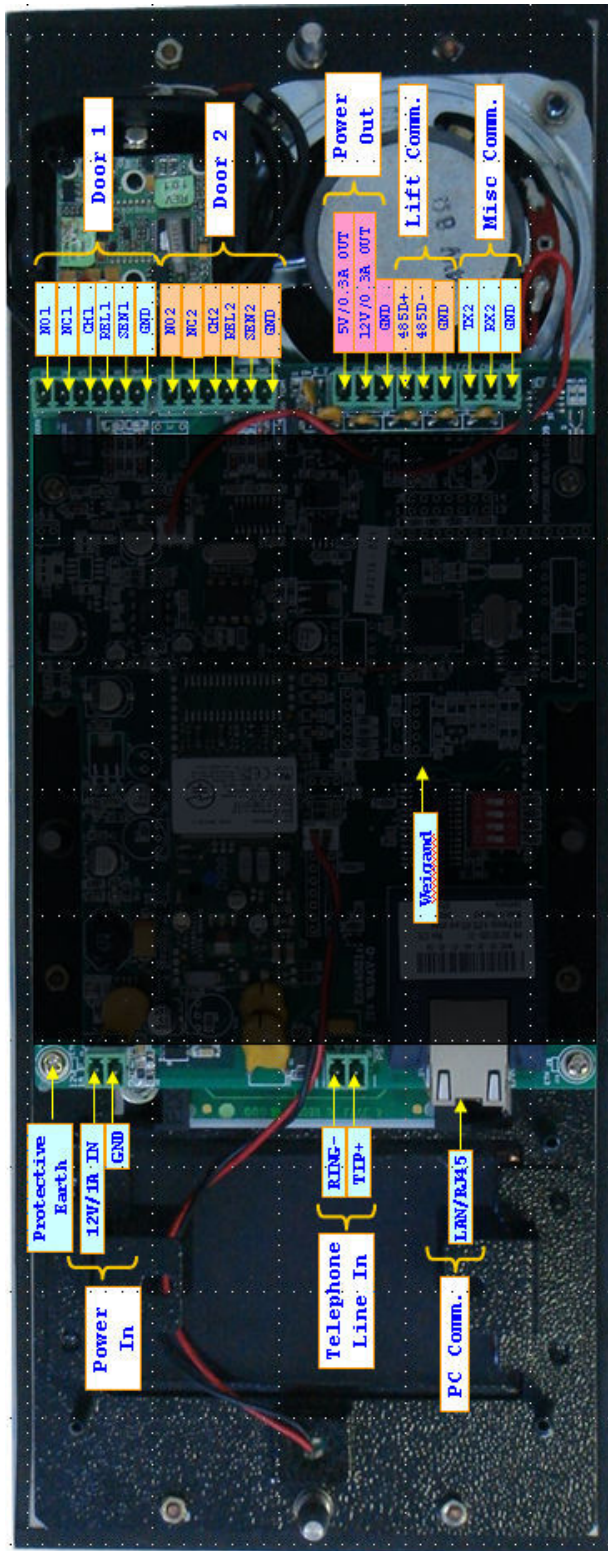

Securing the front panel is by snapping the panel onto the four spring brackets of the recess mounting box. Instructions to insert the front panel is given below
